

HEALTH, SAFETY AND ENVIRONMENT POLICY

Metgasco is an Australian energy company developing gas reserves and power for the eastern Australian energy market.

Metgasco is committed to Best Practice in providing a safe and healthy workplace and to protecting the environment through sound management practices.

Metgasco will strive to meet and in most cases exceed compliance with all applicable laws, regulations and relevant standards.

Metgasco will achieve excellence in health, safety and environmental management by :

1. Providing and maintaining systems for a healthy, safe and sound environment for all staff and contractors.
2. Having in place appropriate emergency response procedures.
3. Ensuring employees are adequately trained and supervised to perform their jobs in a safe and environmentally responsible manner.
4. Maintaining an open and a two way communication with landholders and stakeholders about Metgasco's projects and activities.
5. Encouraging ongoing constructive contributions from all employees towards improvements in occupational health, safety and environmental standards.
6. Consultation with landholders on restoration standards and promptly completing restoration works upon the completion of activities.
7. Selecting our work areas and establishing our infrastructure in locations that minimises the need to clear native vegetation.
8. Reducing solid and liquid waste disposal through the introduction of waste reuse and recycling options where practicable.
9. Ensuring that approved safety devices and personal protective equipment are supplied and used wherever needed.
10. Minimising air emissions through improved equipment design and efficient equipment operation.
11. Ensuring that improved technologies in health, safety and environmental management are reviewed and implemented where possible.
