No action has been taken to register or qualify the Attaching Options, or the Offer, or otherwise to permit the offering of the Attaching Options, in any jurisdiction outside of Australia or New Zealand.

The distribution of this Prospectus within jurisdictions outside of Australia may be restricted by law and persons into whose possession this Prospectus comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of those laws.

This Prospectus does not constitute an offer of Attaching Options in any jurisdiction where, or to any person to whom, it would be unlawful to issue this Prospectus. In particular, this Prospectus may not be distributed to any person, and the Attaching Options may not be offered or sold in any country outside Australia except to the extent permitted below.

Special notice to New Zealand resident investors

This Offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act 2001 (Australia) and regulations made under that Act. In New Zealand, this is subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.

This Offer and the content of the offer document are principally governed by Australian rather than New Zealand law. The Corporations Act 2001 (Australia) and the regulations made under that Act set out how the offer must be made.

There are differences in how financial products are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.

The rights, remedies, and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies and compensation arrangements for New Zealand financial products.

Both the Australian and New Zealand financial markets regulators have enforcement responsibilities in relation to this Offer. If you need to make a complaint about this Offer, please contact the Australian Securities and Investments Commission (<https://asic.gov.au/>). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of Australian financial products is not the same as for New Zealand financial products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

This Offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to the changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.

If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.

If the financial products are able to be traded on a financial product market and you wish to trade the financial products through that market, you will have to make arrangements for a participant in that market to sell the financial products on your behalf. If the financial product market does not operate in New Zealand, the way in which the market operates, the regulation of participants in that market, and the information available to you about the financial products and trading may differ from financial product markets that operate in New Zealand.

United States

The Attaching Options have not been, and will not be, registered under the US Securities Act or the securities laws of any state of the United States and may not be offered or sold, directly or indirectly, in the United States or to, or for the account or benefit of, a US person, except in a transaction exempt from the registration requirements of the US Securities Act and applicable United States state securities laws.

This Prospectus is neither an offer to sell nor a solicitation of an offer to buy securities as those terms are defined under the US Securities Act. The Offer is not being made to US persons or persons in the United States.

1.12 Risks

Eligible Shareholders should carefully read the section on risk factors in section 3 of the Prospectus.

(b) Management discussion and analysis of proforma balance sheet

The proforma balance sheet is not a forecast.

The actual financial position of the Company on completion of the Offer will differ from the position illustrated in the pro-forma capital structure and pro-forma balance sheets due to net expenditure during the period between 30 June 2020 and the date when the Offer is completed.

2.5 Effect of the Offer on control

Given that no issue of New Shares under the Placement resulted in a material impact on control and no Shareholder was able to take up more than \$30,000 worth of New Shares pursuant to the SPP, no Shareholder will receive more than 400,000 Options each. Accordingly, the Offer will not have an impact on control of the Company.

3 Risk factors

3.1 General

There are a number of factors, both specific to the Company and of a general nature, which may affect the future operating and financial performance of the Company, its products, the industry in which it operates and the outcome of an investment in the Company. There can be no guarantee that the Company will achieve its stated objectives or that forward-looking statements will be realised.

This section identifies the major areas of risk identified by the Directors associated with an investment in the Company, but should not be taken as an exhaustive list of the risk factors to which the Company and its Shareholders and Option Holders are exposed to now or in the future. Each of the risks set out below could, if it eventuates, have a material adverse impact on the Company's performance, profits and the value of its Shares.

Before deciding to invest in the Company, potential investors should read the entire Prospectus and the risk factors that could affect the financial performance of the Company.

You should carefully consider these factors in light of your personal circumstances and seek professional advice from your accountant, stockbroker or other professional adviser before deciding whether to invest.

3.2 Specific risk factors

In addition to the general risks set out in section 3.1, the Directors believe that there are a number of specific factors that should be taken into account before investors decide whether or not to apply for the Attaching Options offered pursuant to this Prospectus. Each of these factors could have a materially adverse impact on the Company, its expansion plans, exploration and development projects and its financial performance and position. These include:

- (a) Financing risks:** The Company may need to raise additional funds in the future. There is no guarantee that the SPP will be fully subscribed. There is no assurance that the Company will be able to secure additional funding, whether debt, equity or otherwise, on acceptable terms, or at all. Any additional equity financing will dilute shareholdings.
- (b) Economic risks:**
 - (i)** General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

- (ii) If activities cannot be funded, there is a risk that tenements may have to be surrendered or not renewed. Furthermore, share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as general economic outlook, interest rates and inflation rates, currency fluctuations, changes in investor sentiment toward particular market sectors, the demand for, and supply of capital, terrorism or other hostilities; and government fiscal, monetary and regulatory policies.
- (iii) None of Metgasco Ltd, its Directors or officers warrant the future performance of the Company or any return on an investment in the Company.

(c) Operational risks:

- (i) Operations may be affected by various factors, including exploration well dry holes and failure to achieve field development timetables, and associated lower production rates than predicted.
- (ii) Rig mechanical failure or equipment breakdown, adverse weather conditions, industrial and environmental accidents, industrial disputes, and unexpected shortages or increases in the costs of consumables, spare parts, plant, and equipment. Losses resulting from any of these risks could have a material adverse effect on the Company's financial resources or could result in a total loss of the assets affected, and accordingly, may affect the market price of the Shares.

(d) Development risks:

- (i) Oil & gas development is a high risk undertaking and successful development cannot be guaranteed. The Company's financial performance will substantially depend on the accuracy of its sub-surface analysis, the production flow rates achieved and from cost estimates for its exploration well, project development costs and production facilities activities, working capital requirements and the duration of its works program.
- (ii) Due to individual prospect geological risk there can be no assurance that the Company's exploration activities, projects, tenements or databases that the Company holds or may acquire in future, will result in profitable outcomes for the Company.
- (iii) In the event that the Company's exploration and development proves to be unsuccessful, this could lead to a diminution in value of its projects, a reduction in the cash reserves of the Company and the possible relinquishment of one or more of its tenements.

(e) Tenement title:

- (i) Interests in tenements in Australia are governed by Commonwealth and State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments as and when they arise.
- (ii) Further, exploration tenements are subject to periodic renewal. There is no guarantee that current or future tenements will be renewed or approved. Renewal of the term of a granted tenement is at the discretion of the relevant government authority. Renewal conditions may include increased expenditure or work commitments or compulsory relinquishment of the areas comprising the Company's projects. The imposition of new conditions or the inability to meet those conditions may adversely affect the operations, financial position

and/or performance of the Company.

- (f) **Commodity prices:** Fluctuations in the market price for oil or gas could have an adverse impact on the Company's future financial performance.
- (g) **General economic climate:** The Company's funding position and financial performance is impacted by a variety of general global economic and business conditions. A deterioration in these conditions could have an adverse impact on the Company's financial performance.
- (h) **Political risk, commodity price volatility and exchange rates risks:** In the event that the Company achieves production success, the revenue it will derive through the sale of commodities exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for oil & gas, technological advancements, forward selling activities and other macro-economic factors. Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company is and will be taken into account in Australian currency, potentially exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar, as determined by international markets.
- (i) **Reliance on key personnel:** The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its Directors and its key personnel. The loss of the services of certain personnel could adversely affect the Company and its activities.
- (j) **Trading liquidity:** The Company is a small company in terms of market capitalisation, and it may not be covered by a broad base of research analysts. As a consequence, there may be relatively few buyers and sellers of securities on the ASX at any given time and the market price may be highly volatile, particularly in times of share market turbulence or negative investor sentiment. This may present difficulties for Shareholders seeking to liquidate their holdings.
- (k) **Market conditions:**
 - (i) The market price of the Company's Shares can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration and development stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.
 - (ii) The Company also holds a material equity investment in the shares of Byron Energy Limited, which is listed on the ASX and may be subject to varied and unpredictable influences on its valuation. Neither the Company nor the Directors warrant the future value of this financial asset.
- (l) **Environmental risks:** The operations and proposed activities of the Company are subject to State and Commonwealth laws and regulations concerning the environment. As with most exploration and development projects, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws, in order to minimise damage to the environment and risk of liability. Nevertheless, there are certain risks inherent to Metgasco's activities which could subject the Company to potential liability.
- (m) **Occupational health and safety:** The mining industry has become subject to

increasing occupational health and safety (**OH&S**) responsibility and liability. The potential for liability is a constant risk. If the Company fails to comply with necessary OH&S legislative requirements, it could result in fines, penalties and compensation for damages as well as reputational damage.

(n) Changes in political environment and international conflicts:

- (i) The Company's share price and ability to generate returns to investors can be affected by changes in legislation, domestic or foreign governments and government policy. In particular, government policies can have a sudden and material impact on the Company if it results in new trading restrictions, defence or security measures being implemented, or alternatively if such measures are cancelled or postponed.
- (ii) Additionally, the Company's future sales and returns may be influenced by any future domestic or international trading restrictions, conflicts or peacekeeping missions, particularly where such conflicts may impact upon levels of international business or trade.

3.3 General risk factors

(a) Dependence on general economic conditions

The operating and financial performance of the Company is influenced by a variety of general economic and business conditions, including levels of consumer spending, inflation, interest rates and exchange rates, access to debt and capital markets, government fiscal, monetary and regulatory policies.

A prolonged deterioration in general economic conditions, including an increase in interest rates or a decrease in consumer and business demand, could be expected to have a material adverse impact on the Company's business or financial condition. Changes to laws and regulations or accounting standards which apply to the Company from time to time could adversely impact on the Company's earnings and financial performance.

(b) Impact of COVID-19

You will have all seen the dramatic global response to the spread of the COVID-19 pandemic and the fall in commodity prices and global share markets. These events are serious, almost unprecedented, matters and naturally your Directors and management have taken steps to mitigate their impact on the business.

The impact on the ability of the Company's personnel to continue working has been minimal given remote working was already standard. However there remains uncertainty and risk about the impact of the COVID-19 pandemic on the Company's operations.

(c) Tax risk

Any change to the rate of company income tax in jurisdictions in which the Company operates will impact on Shareholder returns, as will any change to the rates of income tax applying to individuals or trusts. Any change to the tax arrangements between Australia and other jurisdictions could have an adverse impact on future earnings and the level of dividend franking.

(d) Legislative and regulatory changes

Legislative or regulatory changes, including property or environmental regulations or regulatory changes in relation to products sold by the Company, could have an adverse impact on the Company.

4 Rights attaching to securities

4.1 Rights attaching to Attaching Options

The Attaching Options entitle the holder to subscribe for Shares on the following terms:

- (a) Each Option gives the Option Holder the right to subscribe for one Share. To obtain the right given by each Option, the Option Holder must exercise the Attaching Options in accordance with the terms and conditions of the Attaching Options.
- (b) The Attaching Options will expire at 5.00pm (WST) on 30 September 2021 (**Expiry Date**). Any Option not exercised before the Expiry Date will automatically lapse on the Expiry Date.
- (c) The amount payable upon exercise at each Option will be \$0.05 per Attaching Option (**Exercise Price**).
- (d) The Attaching Options held by each Option Holder may be exercised in whole or in part, and if exercised in part, multiples of 1,000 must be exercised on each occasion. Where less than 1,000 Attaching Options are held, all Attaching Options must be exercised together.
- (e) An Option Holder may exercise their Attaching Options by lodging with the Company, before the Expiry Date:
 - (i) a written notice of exercise of Attaching Options specifying the number of Attaching Options being exercised; and
 - (ii) a cheque or electronic funds transfer for the Exercise Price for the number of Attaching Options being exercised,

(**Exercise Notice**).
- (f) An Exercise Notice is only effective when the Company has received the full amount of the Exercise Price in cleared funds.
- (g) Within 10 business days of receipt of the Exercise Notice accompanied by the Exercise Price, the Company will allot the number of Shares required under these terms and conditions in respect of the number of Attaching Options specified in the Exercise Notice.
- (h) The Attaching Options are non-transferable nor will they be listed on the ASX.
- (i) All Shares allotted upon the exercise of Attaching Options will upon allotment rank pari passu in all respects with other Shares.
- (j) The Company will apply for quotation of the Attaching Options on ASX, however the Attaching Options will only be quoted if the ASX quotation conditions are met.
- (k) If at any time the issued capital of the Company is reconstructed, all rights of an Option Holder are to be changed in a manner consistent with the Corporations Act and the Listing Rules at the time of the reconstruction.
- (l) There are no participating rights or entitlements inherent in the Attaching Options and Option Holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Attaching Options. However, the Company will ensure that for the purposes of determining entitlements to any issue, the record date will be after the issue is announced. This will give Option Holders the opportunity to exercise their Attaching Options prior to the date for determining entitlements to participate in any such issue.
- (m) Other than pursuant to term (n), an Option does not confer the right to a change in exercise price or a change in the number of underlying securities over which the Option can be exercised.
- (n) In the event the Company proceeds with a bonus issue of securities to Shareholders after the date of issue of the Attaching Options, the number of securities over which an Option is exercisable may be increased by the number of securities which the Option Holder would have received if the Option had been exercised before the record date for the bonus issue.

4.2 Rights attaching to Shares issued from exercise of Attached Options

(a) General

The rights and liabilities attaching to Shares are set out in the Company's constitution and are regulated by the Corporations Act, the Listing Rules, the rules of ASX Settlement and the general law. Set out below is a summary of the principal rights and liabilities attaching to the Shares. This summary is not exhaustive and is not a definitive statement of the rights and liabilities of Shareholders.

(b) Voting rights

Subject to any rights or restrictions for the time being attached to any class or classes of Shares, at a general meeting, every Shareholder present in person or by proxy, representative or attorney has one vote on a show of hands and, on a poll, one vote for each fully paid Share. If a Share is a partly paid Share, the holder has a vote in respect of each share on a poll that has the same proportionate value as the proportion that the amount paid (excluding any amount paid or credited as paid in advance of a call) on the share bears to the total issue price of the share.

A Shareholder is not entitled to vote at a general meeting unless all calls and other sums presently payable by the member in respect of a share have been paid. Where a Share or partly paid share is jointly held, only one of the joint holders may vote.

(c) General Meeting and notices

Each Shareholder is entitled to receive notice of, and to attend and vote at, the Company's general meetings and to receive all notices, accounts and other documents required to be sent to Shareholders under the constitution, the Corporations Act or the Listing Rules.

(d) Dividends

Subject to the Corporations Act, the Company's profits which the Directors determine to distribute by way of dividends are divisible amongst the holders of Shares in proportion to the amounts paid (excluding any amount paid or credited as paid in advance of a call) on the Shares.

(e) Variation of class rights

At present, the Company only has ordinary Shares on issue and has no current plans to create further classes of Shares. The rights and restrictions attaching to a class of the Company's Shares can only be altered with the consent of a special resolution passed at a separate meeting of the holders of that class of share by 75% of those holders, who, being entitled to do so, vote at that meeting or with the written consent of members with at least 75% of votes in the class.

(f) Further issues of Shares and Options

The Directors may, subject to the Corporations Act, the Listing Rules or any special rights conferred on the holders of any Share or class of Share, issue or dispose of Shares or grant options over Shares to any person at any time and on any terms and conditions as they think fit.

(g) Pre-emptive rights

Holders of Shares do not have any pre-emptive rights under the constitution. Under the Listing Rules, certain restrictions apply to a listed company offering its Shares otherwise than pro-rata among Shareholders.

(h) Winding up

Subject to the rights of holders of Shares issued on special terms and conditions, on a winding up of the Company, the liquidator may, with the sanction of a special resolution of the Company, divide among the Shareholders in kind the whole or any part of the Company's property. The liquidator may set such value as it deems fair on any property to be so divided and may determine how the division is to be carried out as between Shareholders or different classes of holders.

(i) Small holdings

Subject to the Listing Rules and ASX Settlement Operating Rules, the Company may, in accordance with the procedure set out in the constitution, sell the Shares of a Shareholder who holds less than a marketable parcel of Shares.

(j) Buy backs

Subject to applicable laws, in particular the Corporations Act and the Listing Rules, the Company may buy back Shares on such terms and conditions as the Board may determine from time to time.

(k) Transfer of Shares

Subject to the Listing Rules and the constitution, the Shares are transferable in accordance with CHESS (for CHESS Approved Securities), by instrument in writing in any usual or common form or in any other form that the Directors approve. The Directors may, subject to the requirements of the Listing Rules, request ASX Settlement to apply a holding lock to prevent a transfer of Shares in the Company in the circumstances set out in the constitution.

(l) Directors

The minimum number of Directors is 3 and the maximum is 9. The Board may appoint additional Directors to fill a casual vacancy subject to the number of Directors not being more than the permitted maximum of 9. The Directors may not reduce the minimum number of Directors below the number in office at the time of the reduction. At each of the Company's annual general meetings, one-third of the Directors (or, if the number of Directors is not a multiple of three, then the number nearest one-third) and any other Director who has held office for three years or more must retire from office. Any Managing Director is exempted from retirement by rotation. A retiring Director is eligible for re-election.

(m) Indemnities and insurance

The Company may, to the extent permitted by law and subject to the Corporations Act, indemnify current and past Directors, secretaries and executive officers of the Company and of any subsidiary of the Company against a liability incurred by the person acting in that capacity and against all legal costs incurred in connection with proceedings in which the person becomes involved because of that capacity. The Company may pay the premium on a policy of insurance in respect of a person who is or has been an officer of the Company to the full extent permitted by the Corporations Act.

(n) Amendment of the constitution

The Corporations Act provides that the constitution of a company may be modified or repealed by a special resolution passed by the members of the Company. The Company's constitution does not impose any further requirements to be complied with to effect a modification of the constitution, or to repeal it.
